

**SECRET**

OSA-2383-63

7 MAY 1963

**MEMORANDUM FOR THE RECORD**

**SUBJECT : AFIGO-S Support for Manning** [redacted] **25X1A**  
**(Fire Fighters and Dog Handlers)**

**REFERENCE:** [redacted] dtd 12 April 1963 and  
[redacted] dtd 11 April 1963.

1. On 26 April 1963, [redacted] and the under-  
signed met with Colonel Geary, Lt. Colonel Honeywell, Colonel  
Reif of OSI, Major Gordon Blood of HQUSAF, Personnel, and  
Major Reid of MMPD Manning Branch. The purpose of the meeting  
was to establish the mechanism whereby Colonel Geary could  
man [redacted] with Fire Fighters and Dog Handlers. **25X1A**

2. A listing of 4 alternative courses of action were  
drawn up for Colonel Geary's consideration (attached).

3. Beyond the mechanics of administration, the more basic  
but less timely to solve problem of obtaining the manning from  
Colonel Geary without a charge to the Agency ceiling was not,  
in fact, resolved. Last week, [redacted] acting as  
Project Officer on this matter for Colonel Geary, had strongly  
suggested that we bring the people on board as details in the  
normal fashion. Although Colonel Geary again raised his offer  
to man [redacted] with no charge to the Agency, he did agree  
that he would take action to obtain the requisite space from  
Manpower Control in the Pentagon. I am quite sure, however, that  
no action will be taken until the procedure for administering  
these personnel is worked out. **25X1A**

4. The 11 Dog Handlers have already been screened for [redacted] **25X1A**  
[redacted] and it is recommended that we do not obtain manning space  
from Colonel Geary for these individuals because of the  
relatively long period involved. Rather, it is recommended that  
the Dog Handlers be detailed even though we have not provided  
manning spaces in our recent T/O submission. To accomodate these  
individuals, the following alternatives come to mind:

- A. Amend our present T/O paper;
- B. (1) Detail the Dog Handlers on an  
overage basis and as soon as Colonel

Page 2

Geary comes up with spaces and a mechanism to administer the spaces, transfer 7 or all (10) detailed Fire Fighters to Colonel Geary's control; or

(2) Do not worry about the overage since, by July and August of 1963, all 10 Fire Fighters will be up for rotation out of [ ] and they or their replacements could, at that time, be transferred to Colonel Geary's control.

25X1A

In the interest of efficiency and not to rock the boat, recommend E(2) be followed.

5. Detailing of the Dog Handlers proposes additional problems. [ ] of Security, OSA, has worked on this manning with Colonel Reif. All work accomplished to date has been on the basis that individuals would be assigned and not detailed. And, in order to accomodate these individuals on a detailed basis, we would have to accomplish the following additional requirements:

25X1A

- A. Headquarters medical processing;
- B. Obtain security approval on a detail rather than an assignee basis; and
- C. Polygraph.

It is my feeling that Colonel Reif would not object to this change in procedure although a switch at this late date will cause some inconvenience. The advantages heavily out-weigh the disadvantages. In addition, this would mean that the responsibility for security in all technical ways falls under the control of the Agency. This seems to be a sounder concept on which to operate than one which finds us dividing up the security control even in a technical manner.

6. We shall pursue with AFIGO-S the other matter of establishing space and administrative capability for the Fire Fighters. However, we would propose that a review of the situation is in order for the Fire Fighters. The real question is for the 30 odd manning spaces required at present: is this an exercise which makes sense or is it really one of futility? It may be

practical to address ourselves to a T/O increase, especially if an amendment will be required to support the Supply Depot. However, if ceiling is sacrosanct, no matter how strongly justified, maybe we should transfer the Supply Depot to USAF on an assignee basis and treat the Fire Fighters in a like manner and also search out other areas where we will look good on paper.
